

# a sound guide to **Warsaw**

This CD is the result of a project in which musicians and sound artists were asked to create a sound piece based upon and inspired by the field recordings made in Warsaw, Poland. The collected tracks may be viewed as a sound guide to Warsaw, reflecting the artists' interpretation of the Warsaw soundscape and presenting their sonic visions of the city.

The basis for all the tracks were the recordings from places located all over Warsaw and the artists were free to process them in any way they wished. Additionally, the tracks could be enriched with recordings of acoustic instruments so that the field recordings were not only the sound material, but also an inspiration.

The artists who took part in this project are associated with the **Warsaw Electronic Festival**.

Project curated by **Łukasz Ciszak**  
Cover design by **Łukasz Ciszak**  
Mastering by **Krzysztof Orluk**

The project was possible thanks to the support of the **Fundacja Sztuka i Technologia** and **WEFREC**
